

About this Journal

Bulletin of applied Economics is an international, peer-reviewed scholarly open access journal on international economics, instruments, policy and risk management research. It publishes reviews, regular research papers, and communications; there is no restriction on the length of the papers. Our aim is to encourage scientists to publish their experimental and theoretical research in as much detail as possible. Full experimental and/or methodical details must be provided for research articles.

The Bulletin of applied Economics considers submissions in the form of research papers on the following, but not limited to, topics:

- Risk management regulations and their implications
- Risk capital allocation and risk budgeting
- Theoretical development of alternative risk measures
- Economic theory
- Monetary Theory and Policy
- Applied Macroeconomics
- National and international income distribution
- Interdisciplinary financial studies
- International financial crises and regulation
- Methodologies and conceptualization issues related to finance
- Capital Allocation
- Public Economics and Public Policy
- Applied Financial Econometrics
